

## **Town of Eastham Announces Deadline for Private Road Snow Plowing Applications**

Applications for plowing private roads must be received by the Eastham DPW by November 16, 2015 for roads to be considered for this year's plowing program.

The Board of Selectmen adopted minimum standards for the first year of the program which included only paved roads with a width of no less than 20 feet. The roads must have roadside clearance of 2 feet on either side with a height clearance of no less than 14 feet from the road surface. All roads must have a reflective street sign with ample room for snowplow trucks to turn around if the road is a dead end. Roads must be open to the public and be in good repair. In order to be considered for plowing every private road must submit an application to the town. The application must include 100% of the homeowner's and abutter's signatures. Roads will be inspected to see if they meet the minimum standards. Please contact Teena Tilton 508-240-5973 with any questions.
